

ACIDIRID

**NEW
PRODUCT**

ACIDIRIDV

- 1 section
- Treatment capacity: 2,1 GPH
- CN500

ACIDIRIDXV

- 3 sections
- Maximum capacity treatment: 6.3 GPH
- CN1500

ACIDIRIDXp

- 2 sections
- Maximum treatment capacity: 4.2 GPH
- Waterproof and dust proof pump
- CN1000p

ACIDIRIDXL

- Commercial
- Modular
- Treatment capacity: 10,500 MBH
- CN5000

The **Condensate Neutralizer AcidiRID** product line from Centrotherm that offers a quick, clean, and convenient solution. Top lid design provides direct access to the engineering media bag, so no disconnection is required to replace the media.

AcidiRID V

Adapts a female PVC / CPVC coupler or appliance flue exhaust to InnoFlue® SW diameters.

Part #	Length	Width	Height
CN500	5¾ (14,5)	4¾ (12)	5 (12)

AcidiRID XV

Adapts a female PVC / CPVC diameter appliance flue exhaust (with integrated gasket) to InnoFlue® SW diameters.

Part #	Length	Width	Height
CN1500	4¾ (12)	12 (30,5)	5½ (14)

AcidiRID XL

Adapts a female PVC / CPVC diameter appliance flue exhaust (with integrated gasket) to InnoFlue® SW diameters.

Part #	Overall Length	Width	Height
CN5000	16¾ (414)	10½ (267)	7½ (190)

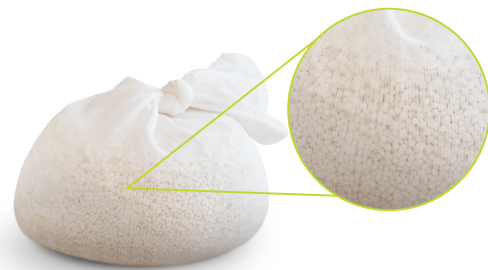

AcidiRID Xp

Adapts a female PVC / CPVC diameter appliance flue exhaust (with integrated gasket) to InnoFlue® SW diameters.

Part #	Overall Length	Width	Height
CN1000p	15 5/8 (40)	5 (12,7)	4¾ (12)

Time Indicator

To protect the environment and building components, we have included a **12-month time indicator**, so the user knows exactly when to replace the media bags. If they are not changed regularly, your water will continue to pass, but will no longer be treated. It is therefore important to change your media bags every year to protect the drain against corrosion.

Engineered media included
